

Research opportunities in Industry: an ICT domain perspective

Dr. S. Jagannathan

Semiconductor and embedded systems usage increased in an exponential order for all fields. It created more employment opportunities, interdisciplinary departments etc. The trend was in a very good shape in the past. The present scenario needs good introspection and maturity for next level of perfection for innovations in carried out in the past and more innovations for the future. There is an ample and more scope for academia and industry (Semiconductor and Service Companies) to play for the same.
