**OBJECTIVE**

To get the students acquainted with the vast domain of the Ad Hoc Networks and provide hands on experience with its various system design and applications using NS2 Simulator. Participants will be familiarized with various aspects like design, mathematical models, protocols, graph algorithms etc. of Ad Hoc Networks which they will apply practically using NS2 simulator. NS2 is a discrete event simulator targeted at networking research.

**Who should attend?**

All undergraduate and graduate students who have already done some introductory course in the networks field or faculty members who would like to have a first hand experience on NS2. This workshop will be highly beneficial for all those who are willing to do work in the field of research in Ad Hoc Networks.

**Speakers**
