TWO DAYS WORKSHOP ON SIMULATIONS IN ICT

March 17-18, 2007
DA-IICT, GANDHINAGAR

Information Communication Technology (ICT) is full of events based primarily on communicating processed data (image or speech) on some particular network. IEEE Student Branch of DA-IICT is organizing a two days workshop on applications of simulations of such events falling under the purview of ICT. Workshop is organized with the aim of highlighting the widespread use of simulations for verification and modeling in the field of ICT. It would cover various aspects of

- Discrete Event Simulation
- Image Processing , Speech Processing
- Networking Protocols
- Digital Systems
- Communication Systems.

IEEE Student Branch, DA-IICT, offers you a rare opportunity to learn the complete breadth and depth of these areas in two days by five experts from **DA-IICT**. Each of these five experts would share the latest development in his field namely Mathematics, Image processing, Computer Networks, VLSI & Communication Systems. Lectures would be accompanied by case studies, hands-on experience and demonstrations using packages like Matlab, Simulink, NS2 and LAN Trainer.

Benefits to participants of the Workshop

- You would develop fundamental understanding and implementation skills in the area of Simulations.
- You would learn to design and verify networking protocols, communication systems and digital systems.
- You would appreciate the importance of simulations.
- You would get to know research methodologies in fields of ICT and appreciate how these fields are interrelated.

Registration Fees		
	Early Bird Registration	On the Spot Registration
Students (IEEE Members)	Rs 100	Rs 200
Students (Non-IEEE Members)	Rs 350	Rs 500
IEEE Membership + Workshop Registration	Rs. 700	Rs 700
